

NSSC ELMT MongoDB Information Sheet

Product: MongoDB

Manufacturer: MongoDB

Vendor: Carahsoft Technology Corporation

Summary: The NASA Shared Services Center (NSSC) Enterprise License Management Team (ELMT) announces the award of an agency agreement for MongoDB. MongoDB is an open-source database that allows schemas to change quickly as applications evolve, while still providing the functionality developers expect from traditional databases, such as secondary indexes, a full query language and strict consistency. MongoDB is built for scalability, performance and high availability, scaling from single server deployments to large, complex multi-site architectures. By leveraging in-memory computing, MongoDB provides high performance for both reads and writes. MongoDB's native replication and automated failover enable enterprise-grade reliability and operational flexibility.

INCLUDED: Full complement of MongoDB products and services available to all NASA Centers.

License Term: Base period, with two additional one year options

A Purchase Request (PR) is required to order under this agreement if the amount of the order exceeds the Federal Acquisition Regulation (FAR) threshold for micro-purchases.

For software procurements at or below \$150,000 for ELMT enterprise agreement purchases, the Simplified Acquisition Threshold (SAT) team at the NSSC will process these requests. To initiate the request you can proceed either directly to SAT through their portal or you can send the PR directly to the ELMT.

To proceed via SAT: click the ESD link <https://esd.nasa.gov/esd/>, then go to **Order Services** and then go to **NSSC Simplified Acquisition Customer Portal** (Green SAT Button) to initiate the purchase. When creating a ticket please include the ELMT agreement number in the “Give a brief description” field.

All purchases for software over \$150,000, for ELMT enterprise agreement purchases, ELMT will process these requests.
